columns, call the attention of the proper authorities to an evil (I might call it a most barefaced swindle or robbery) now prevailing in this colony in the shape of filing composition deeds. In the Court of Bankruptcy, honest merchants and dealers who have failed in business through their misfortunes have to present their account books to their creditors before they can be discharged, but young men without capital or means, receiving a paltry salary of from \$30 to 3125, on which they can hardly maintain themselves, who employ their leisure hours in gambling, and consequently run into debt, find salvation in a composition deed. How do they do it? in trouble; his debts, through gambling at eards and po-tze at Kowloon City, amount to \$1,500: His creditors are pressing him, and his salary is only \$100. meeting to be held in the year 1892. 6.-With a paid up Capital of \$500,000, A reserve liability of \$475,000, and a select body of shareholders, this Company may reasonably hope to be able to carry on operations to the extent of from three to five millions of dollars, obtaining from local Banks and financial institutions facilities that no individual dealer or firm could command, and affording, in turn, to these institutions, guarantees and securities they could not well obtain elsewhere. 7.—Reasonably handsome dividends on the

paid up capital may be secured by simply invest- T. E. Davies, Esq. ing in, and holding, carefully selected local dividend-paying Stocks, purchased at the favourable moment. Trust Companies in England formed for the purpose of such investments have been almost uniformly successful. Had such a Company existed in Hongkong twenty years ago, the average return on investment made then would now be about 175 per cent. on the money originally, laid out, and the increase in value of the Stocks purchased would average about 140 per cent. New Companies are likely to be formed here from time to time for a variety of purposes, and

there is no reason to suppose that investments made in their shares in the early stages of their history as dividend-paying Companies, may not. in the course of years, show as handsome profits, and as vast increases in value as any known in the past. The Stocks and Shares of existing Companies afford also, on occasions, favourable opportunities for investment. 8.—It will form no portion of the this Company to float personal write shares, or invest

the Stocks, Shares, and prises indicated in par-9.-Profits, and cons believed, be made by t day to day of local S tures of the description The value of Share ery great, so great the afforded by the Bank dealers are unable for 16 situation and afford to the Molders ade

quate outlets. There are few or no permanent investors in the Colony, and there are therefore great and frequent fluctuations in values. The ever changing nature of the population is constantly throwing shares and stocks upon the market, quite spart from the operations of speculative dealers, and thus very valuable opportunities are constantly being offered to buyers with capital at command. The Company will, it is hoped, not merely

secure reasonable profits for its shareholders but will confer a benefit on the shareholding community generally by steadying the local markets and ensuring them against violent fluctnations. 10.-Considerable profits may also be antisipated from the employment of a portion of the

Company's resources in " Cash and Time " doalings in shares, identified by numbers or otherwise, and deposited in the hands of the Company or with its Bankers. Those acquainted with this class of business in Hongkong and Shanghal are well aware of the heavy rates of interest paid in respect of such transactions, and will see what an opening exists for a business as safe as it is profitable. 11 Between the Head Office in Hongkong

and the London Branch or Agency, useful business in the nature of "Arbitrage," now growing into importance, may be transacted 12.-In one or all of the forms of business indicated in the preceding paragraphs, it is anticipated that handsome profits may be made, and by a judicious admixture and selection, it is believed that a safe as well as a profitable business may be carried on.
